DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-28, drawn to a method of limiting access to data stored on an optical medium, an optical disk adapted for use in an optical readout system, and an article of manufacture adapted to be encoded with data and further adapted so that duplication of the data by an optical scanning machine may be inhibited.

Group II, claim(s) 29-109, drawn to a method of limiting the use of information stored on an optical medium, an apparatus for limiting the use of information stored with an optical medium, and a storage medium having limited access.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I requires that the optical disk includes a reactive compound contacted by a light for reading data structures, the reactive compound operative to change its physical characteristics in response to selected environmental stimulus thereby to affect readability of the data by an interrogating beam of light, which is not required by Group II.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I: figures 2-5B;

Species II: figures 6A-7B;

Species III: figures 11A-12;

Species IV: figures 13A-14B;

Species V: 15A & 15B;

Species VI: 16A & 16B;

Species VII: 17A-18;

Species VIII: 19A-20;

Species IX: 21A & 21B.

Art Unit: 2653

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election. Currently, no claim is considered generic.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features.

A telephone call was not made to the applicants' representative to request an oral election to the above restriction requirement due to the nature of the application, i.e., the relative complex nature of the restriction requirement, and the need for the examiner to promptly act on the application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Huber whose telephone number is 703-308-1549.
